

Who We Are

Coalition of Angelenos committed to working together to increase public trust and voter confidence in elections.

Mission Statement

Ensure public trust and voter confidence in Elections through collaboration, communication, and dedicated election education across Los Angeles County.

Strategic Approach

The effort joins forces across neighborhoods, cities, and communities, working collaboratively to build awareness of election integrity. Coalition members raise public awareness and understanding of elections by demystifying processes and describing the many safeguards that maintain the integrity of elections. By bringing together trusted Angelenos, the Coalition is equipped to quell rumors and reject falsehoods regarding election processes.

Nonpartisan. The coalition does not support or oppose candidates, parties, or ballot measures.

Fact-based. Public statements about election administration are grounded in documented procedures, observable processes, and reliable evidence.

Independent. Members speak in their voices and may raise durable reforms that strengthen confidence in the process.

Transparent. The coalition discloses its purpose, leadership and organizational structure.

Respect for outcomes. The coalition's role is to explain and evaluate the administration of elections, not tell voters what political conclusions to reach.

Trust in our election system is a cornerstone of democracy. But democracy depends on confidence that eligible voters can cast their ballot, lawful ballots will be counted, and the public can understand how the process works.

Antonio Villaraigosa
41st Mayor of Los Angeles
